

TDD com Ruby on Rails, RSpec e Capybara

Jackson Pires

The background is a solid green color. It is decorated with various geometric shapes in a lighter shade of green, including squares, circles, and crosses, some of which are rotated or tilted. These shapes are scattered across the entire background.

Helper Methods (let e let!)

The background is a solid green color. It is decorated with various light green geometric shapes scattered across the surface. These shapes include squares, circles, and plus signs. Some of the squares are solid, while others are hollow. The plus signs are also solid. The shapes are of different sizes and are oriented in various directions, creating a patterned effect.

Helper Methods (arbitrário, de módulo, let e let!)

let

Quando você precisa atribuir uma variável, ao invés de usar um bloco `before` para criar uma variável de instância, use `let`. Ao usar `let`, a variável é carregada apenas quando ela é utilizada pela primeira vez no teste e fica na cache até o teste em questão terminar.

let!

Você pode usar `let!` Para forçar a invocação do método/helper antes de cada teste.
